E... I just want to say...

Thank you for playing with me. I'm very happy.

What are you talking about? You accompany Zhen playing as a Queen, know your place!

And what're those pronouns? You? I?

S... sorry! Your humble servant is just...

Your Majesty, please listen to me...

I think after this holiday...

I'll take charge of preparing the class for exams, so we can get good grades!

Ling jieji earned us this precious chance, we have to grab it firmly.

I want to organise group studies for our class, so we can solve problems as soon as...

It's nice but you'll be very tired Queen.

Gosh, she was that energetic, but could never be woken up once fell asleep.

Aaaawww
wwwwww!

Sorry, kept
you waiting

There's a
long cloud
up in the sky

Cloud?

That's not a
cloud, that's

The Milky Way

London city is
too heavily polluted

it's impossible to
see it downtown

Also if the lights
were too bright it
would be able to
see either

...beautiful

We are lucky to
see such a scenery

Many urban kids
today never see
beautiful stars
like this

If I didn't see it
with my own eyes, I
wouldn't believe there
were so many stars

It's the sky

Now would I know the Milky
Way in textbooks is actually
a sheer belt like this

Yeah, imagination often
fills behind reality...our
ancestors won't be able
to imagine the ball is
actually like a disk.

But aren't they
really constant
even if we can't
see?

All we can say is the
place you stand decides
what you can see.

However we...

still prefer to only
believe in what we
see of present!

Thank you...

Um? What?

Nothing. All
I want to say
is...

I can't help making this parody...

Will become a Beijing vagabond since July...
